

COVID-19 Respiratory Virus

What is COVID-19? It is a highly contagious respiratory virus, spread easily from person to person.

What are the symptoms? 1) Fever 2) Cough 3) Shortness of breath

You are at higher risk if you are over 65 years of age and have other health conditions like heart disease, diabetes, lung disease, asthma, etc. Or have a weak immune system because of cancer, HIV, organ transplant, etc.

What should you do? If you cannot breathe, call 911. If you have symptoms, but feel okay, please go to the Urban Rest Stop, 611 East Adams Street, to see a doctor.
